Ddear Harold:

Sticky typewriter! I forgot to tell you something the other day.
About a month ago, I was listening to Don Hewitt, the 70+ year old producer of 60 Minutes. on CBS.
The subject came around to the JFK murder. Hewitt said that he was never convinced that Lee Harvey Oswald had anything to do with it. Since this is CBS, I was quite surprised.

Perhaps this is an oppurtunity. All I know, it was not something I expected to hear from CBS.

Things are going well here, mom has stabilized but has no real quality of life. We survived the Indy 500. I can never go up there without thinking about the James Tague story, with his disappearing film!

I'll write soon.

Love,
Bill
